

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

For the Year MDCLXXV.

L O N D O N,

Printed by T.R. for *John Martyn*, Printer to the *Royal Society*;
at the *Bell* in *St. Paul's Church-Yard*.

PHILOSOPHICAL TRANSACTIONS.

March 25. 1675.

THE CONTENTS.

An Introduction to the Eleventh Year of these Tracts. A Breviate of M. Picarts Account concerning the Measure of the Earth; compared with what hath been done hitherto upon that Subject. Extracts of three Letters: The one of M. Hugen, about a New Invention of very exact and portative Watches, serving to find the Longitudes both at Sea and Land: The second, of Dr. Swammerdam, touching an Un-usual Rupture of the Mesentery: The third, containing some Observations of Mr. Lister about the Star-stones; together with Mr. Rays annotations thereon. An Account of two Books: I. Les dix Livres d' Architecture de VITRUVIUS, corrigez, & traduits nouvellement en Francois, avec des Notes & Figures; par Claude Perrault. II. Dissertatio de Carentia Sensus & Cognitionis in Brutis, A. Ant. le Grand.

PHILOSOPHICAL TRANSACTIONS.

Septemb. 26. 1675;
For the Months of *August* and *September*.

The CONTENTS.

Microscopical Observations of Mr. Leewenhoeck concerning the Optic Nerve. Other Microscopical Observations made by the same about the Texture of the Blood, the Sap of some Plants, the Figure of Sugar and Salt, and the probable cause of the difference of their Tasts. Some Optical Assertions concerning the Rain-bow, by the Learned Franciscus Linus. Observations of the last Eclipse of the Moon, made at Paris. A Letter of Signor Cassini, relating to the foregoing Observations. An Extract of a Letter sent by Mr. Lister, but written by Mr. Jessop, concerning Damps; to which are added some Relations about odd Worms, voided by Children. Some Observations made by Sir George Makenzie in Scotland, concerning Earths, and Agriculture; as also some remarkable Herbs, and Molucco-beans met with on the shoar of the Western Isles of that Kingdom. An Extract of a Letter of Mr. Listers, containing some Observations made at the Barbado's. An account of some Books: I. Marcelli Malpighii ANATOMIE PLANTARUM; cum Appendice de OVO INCUBATO: II. Epistola ad D. Joëlem Langelotum de ACIDI & ALCALI INSUFFICIENTIA ad gerendum mitius Principiorum Corporum Naturalium. III. ZYMOLOGIA CHYMICA, or a Discourse of FERMENTATION, from a New Hypothesis of ACIDUM and SULPHUR; with an Appendix of the Sulphur-Bath at Knaresborough, by William Sympson, M.D.

PHILOSOPHICAL TRANSACTIONS.

January 24. 167 $\frac{5}{6}$.

The CONTENTS.

A Continuation of the Experiments made in the Air-pump by Monsieur Hugen and M. Papin at Paris; which are about the Preservation of Bodies. A Letter of Mr. Flamsteed to Sir Jonas Moor, containing his Observation of the late Lunar Eclipse on Decemb. 21. Mr. Franc. Linus his Letter to the Publisher, being a Reply to a Letter formerly printed by way of Answer to another of the said Mr. Linus, which relates to the Newtonian Theory of Light and Colours. Mr. Newtons Considerations in two Letters on the said Reply, together with further Directions how to make the Experiments controverted aright. An Account of some Books: I. PHARMACEUTICÆ RATIONALIS, five Diatriba de Medicamentorum Operationibus in Humano corpore, Pars Secunda; Auth. Th. Willis M.D. &c. II. COLLEGIUM EXPERIMENTALE five CURIOSUM, in quo primaria hujus Seculi Inventa & Experimenta Physico-Mathematica spectanda exhibuit & ad causas suas naturales demonstrativâ methodo reduxit Joh. Christoph Sturmius, P. P. Norimbergæ. III. ENGLANDS IMPROVEMENT, in two parts, by Roger Coke. IV. The Colledge of Physicians Vindicated, and the True State of PHYSICK in this Nation faithfully represented by Charles Goodall, M. D.
